Physical Therapy Prescription for:

label

Diagnosis: ACL reconstruction w/ IT Band Date of Surgery:

Treatment: See attached ACL Rehabilitation Protocol

Weight bearing status: TDWB w/ crutches for 6 weeks

Brace:

First six weeks post-op:

- > ACL hinged knee brace for weight bearing activities:
 - Locked when ambulating, unlocked when working on ROM (only when non-weight bearing)
 - o May unlock for ambulation as soon as quad control returns
- ➤ Brace range: 0 to 30 degrees x 2 weeks, then 0-90 degrees
- ➤ Brace locked at 0 degrees for sleep for first 2 weeks (or longer if hasn't achieved symmetric terminal extension)

Weeks 6 to 12:

➤ 1-2 week transition out of brace, provided good quad control

Weeks 12 to 14:

- > No brace needed
- > Focus on strengthening
- ➤ HAMSTRINGS!
- ➤ If cleared by therapist, ok to start a return to run program
- ➤ Alternate 10 min brisk walk 10 min jog 10 min brisk walk. Can increase jog portion each week by 2-3 minutes if tolerates well

Additional Instructions:

- > SEE ATTACHED PHYSICAL THERAPY PROTOCOL
- > Patella mobilizations important
